Washington State Health Care Innovation A Five-Year Plan

Tribal Affairs Monthly
Meeting

July 23, 2013

What are “SIM” and “SHCIP”?

SIM

The **State Innovation Models** initiative is a national effort and grant program of the Center for Medicare and Medicaid Innovation (CMMI) to identify and spread health practices that result in **better health and better care at lower costs.**

SHCIP

Washington State was one of three states awarded a nearly **\$1 million model pre-testing grant** to fund collaborative development of a five-year plan for health innovation. Other states have received “model design” grants, and are engaged in similar work. The effort is called: **State Health Care Innovation Planning**

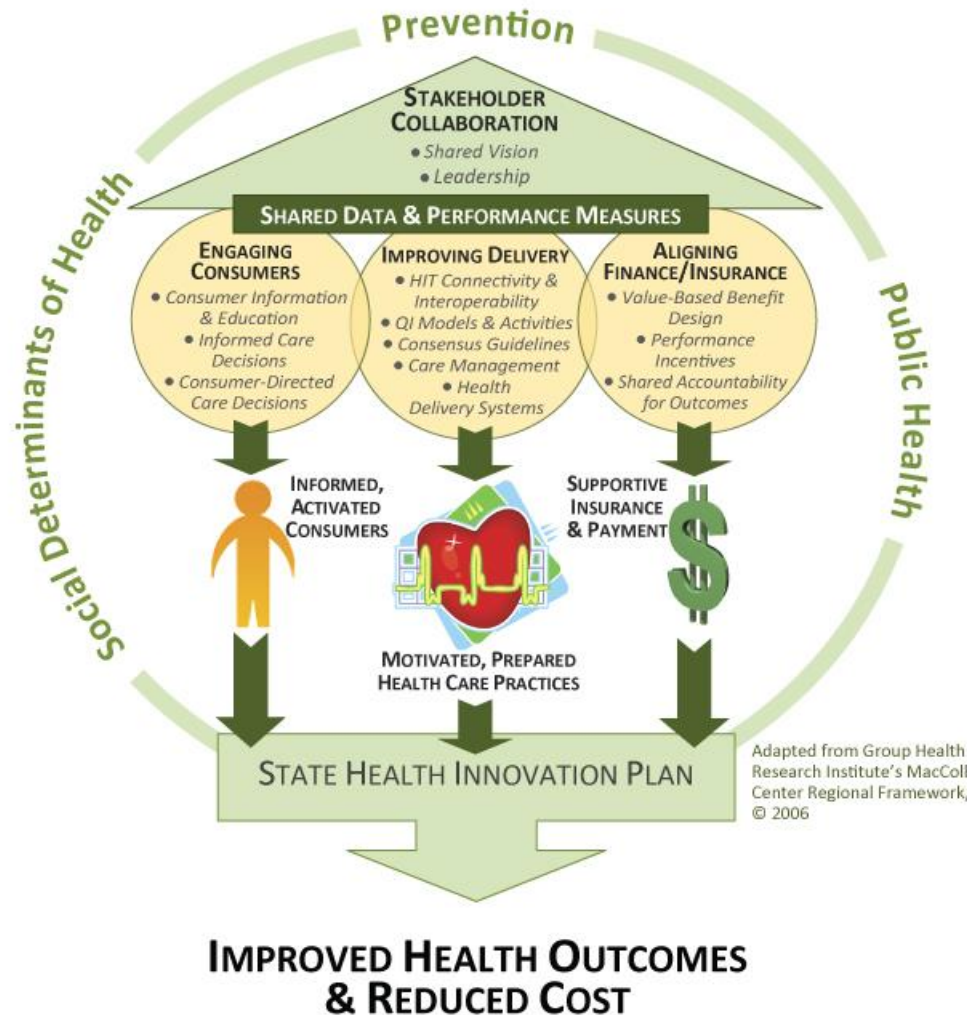

What this is...

An opportunity, with technical support related to federal health programs, to refresh and align key strategies to improve health and healthcare delivery specifically for Washington residents and Washington's communities.

A strategic plan positioning Washington to compete for future anticipated grant funding
(e.g., \$20-\$60 million to support implementation of our multi-payer delivery system and payment reform model)

It is NOT an application for major testing grant funding.

Innovation Plan Conceptual Framework

Key Considerations for Transformation

“As-Is” environment – where we are now

- Gathering information from various “streams” of inquiry

“To be” environment – the potential future

- Identifying:
 - Key focus areas and strategies for transformation
 - The “levers” to move transformation forward
(*activities, tools, policies, legislative adjustments*)
 - Performance measures needed to assess the value of the reforms

Evolving Focus of the Innovation Plan

Two streams of work have been identified to drive planning:

1. Ensure a comprehensive and integrated system to prevent, mitigate and treat behavioral health issues that have the potential to be accompanied by physical co-morbidities

2. Multipayer, purchaser and provider transformation

- ❑ Payment approaches supporting coordinated care
- ❑ Evidence-based care reducing unwarranted variation
- ❑ Consumer engagement
- ❑ Infrastructure
- ❑ Strengthen purchaser alignment and influence
